3.26 The two images shown in the following figure are quite different, but their histograms are the same. Suppose that each image is blurred using a 3×3 box kernel.

(a)* Would the histograms of the blurred images still be equal? Explain.

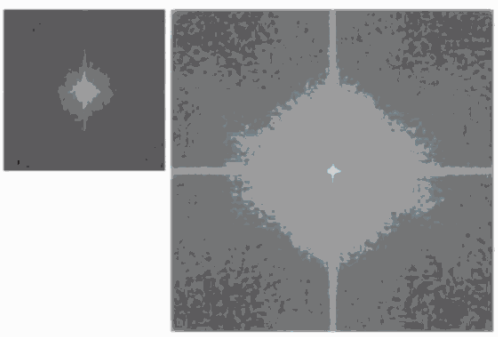

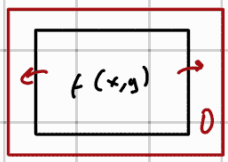

bu yüzden histogramları aynı olmaz

kodunu yazıp çıkan grafikler incelendi, beklenildiği gibi histogramlar farklı çıktı

4.42* The two Fourier spectra shown are of the same image. The spectrum on the left corresponds to the original image, and the spectrum on the right was obtained after the image was padded with zeros. Explain the significant increase in signal strength along the vertical and horizontal axes of the spectrum shown on the right.

Görüntüye sıfır eklemesi sayesinde yüksek frekanslı geçişler olmuştur bu yüzden yüksek frekanslı bileşenler artmıştır.
