ELEC366 COMMUNICATIONS LABORATORY

EXPERIMENT-5 PRE-STUDY QUESTIONS

1) How is demodulation of FSK done by using PLL circuit?

2) How are the coherent and non-coherent demodulations done for the detection of FSK signals? Explain.

3) In which communication systems is ASK used? Draw a simple ASK demodulator and explain how it works?

4) Find the binary ASK and FSK modulated signals for given digital input. (1011101001)
